

TO WHOM SO EVER IT MAY CONCERN

This is to certify that IIM-Shillong is subscribing to India Business Insight since 2014. India Business Insight is a cumulative business intelligence database which indexes original business articles from 167 dailies and fortnightlies with focus on Indian Business.

We find India Business Insight is consulted by our students, faculty and research scholars as they find it quite useful in their class room studies, preparing their project report and case studies. Most of the reference queries related to Indian business are answered using IBID.

This database is very cost effective and files the critical gap of a valuable source on Indian business information.

Regards,
